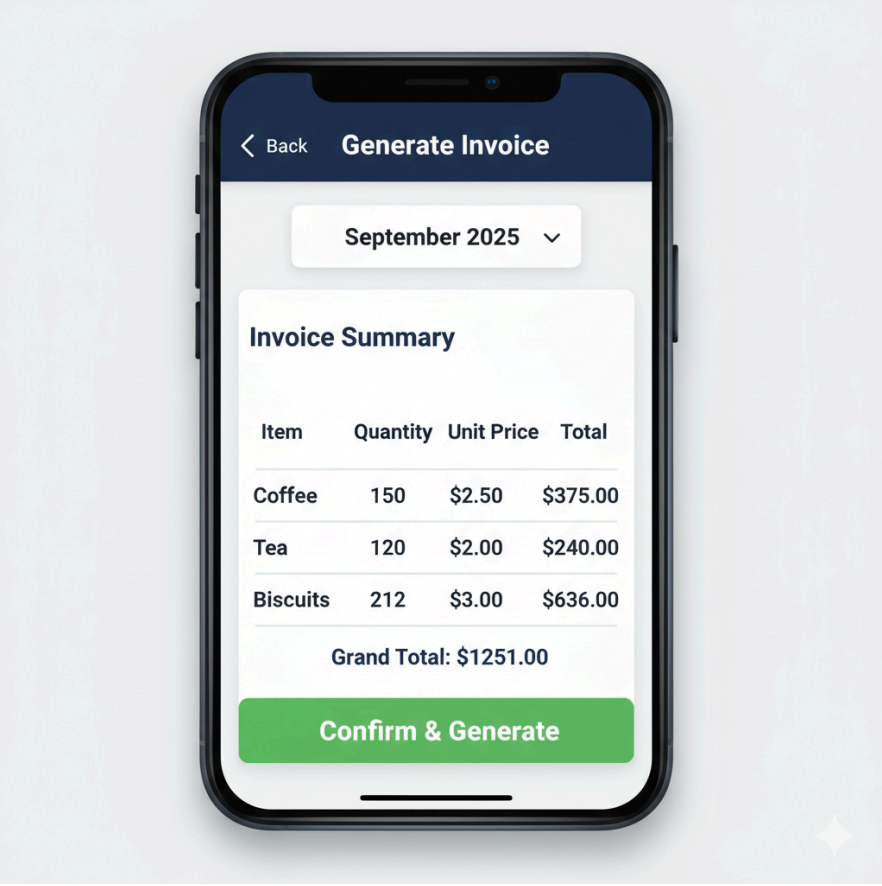
--- SCREEN 5: GENERATE INVOICE ---

My Prompt:
"mobile app UI mockup, "Generate Invoice" screen for the PantryPal vendor app.

Use the same professional style and colors: dark blue header (#0D253F), white background (#F8F9FA), green button (#1DB954).

Screen elements:
- Header with a "Back" arrow and the title "Generate Invoice".
- A month selector dropdown menu at the top, pre-filled with "September 2025".
- A summary section titled "Invoice Summary".
- A table with columns: "Item", "Quantity", "Unit Price", and "Total".
- The table should list items like:
  - Coffee, 150, $2.50, $375.00
  - Tea, 120, $2.00, $240.00
  - Biscuits, 212, $3.00, $636.00
- At the bottom of the table, a bold "Grand Total: $1251.00".
- A large, green "Confirm & Generate" button at the very bottom.

Style: clear, organized, professional invoice layout, high-fidelity UI."

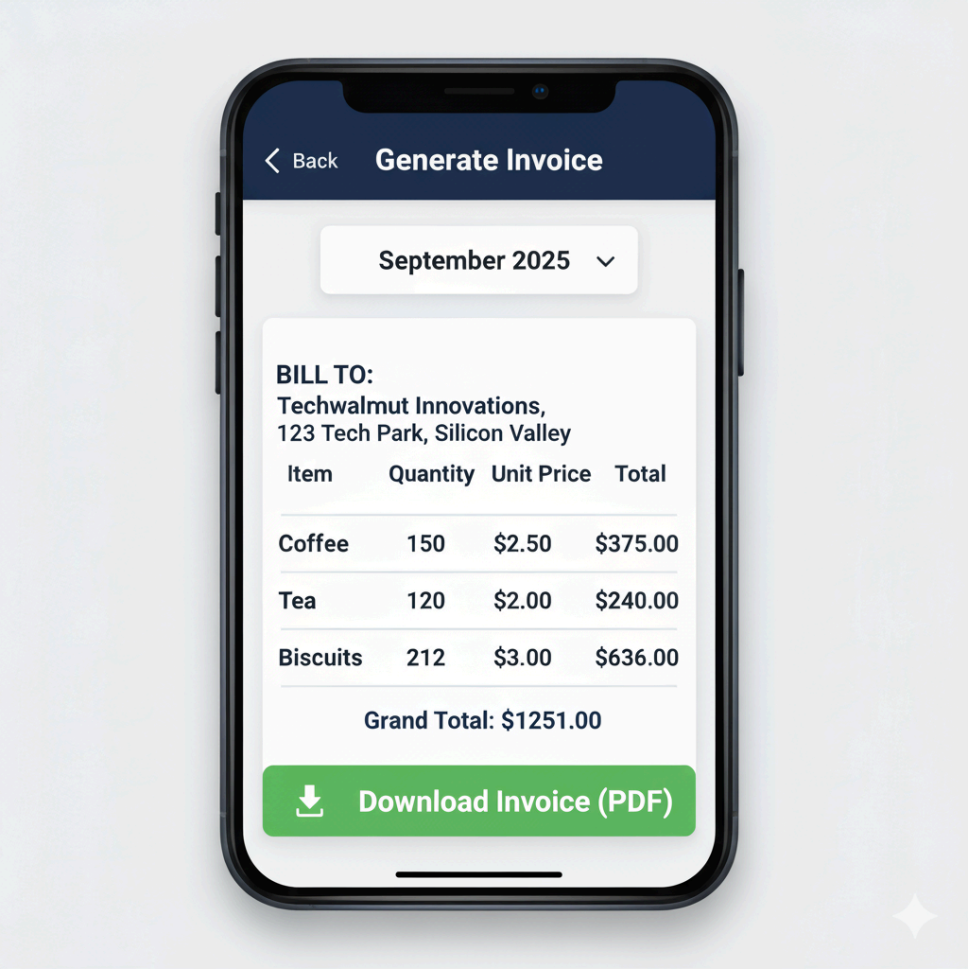


Attempt 2: Refinement Prompt

Reason for change: The first version was a good summary, but it didn't look like an official invoice. By adding a "Bill To" section and making the call-to-action button specific ("Download Invoice"), the screen becomes a much more professional and useful tool for the vendor.

My Refined Prompt:
"Refine the previous "Generate Invoice" UI for the PantryPal app.

Keep the exact same professional style, colors, itemized table, and grand total.

Make these two improvements to make it look like a final invoice:
1. Just below the month selector, add a "BILL TO:" section. It should show a client's name and address, for example: "Techwalnut Innovations, 123 Tech Park, Silicon Valley".
2. Change the main button's text to "Download Invoice (PDF)". Add a small "download" icon to the button if possible.


This makes the screen a more complete and actionable invoice preview. High-fidelity UI mockup."
