

## --- SCREEN 4: VENDOR DASHBOARD ---

My Prompt:

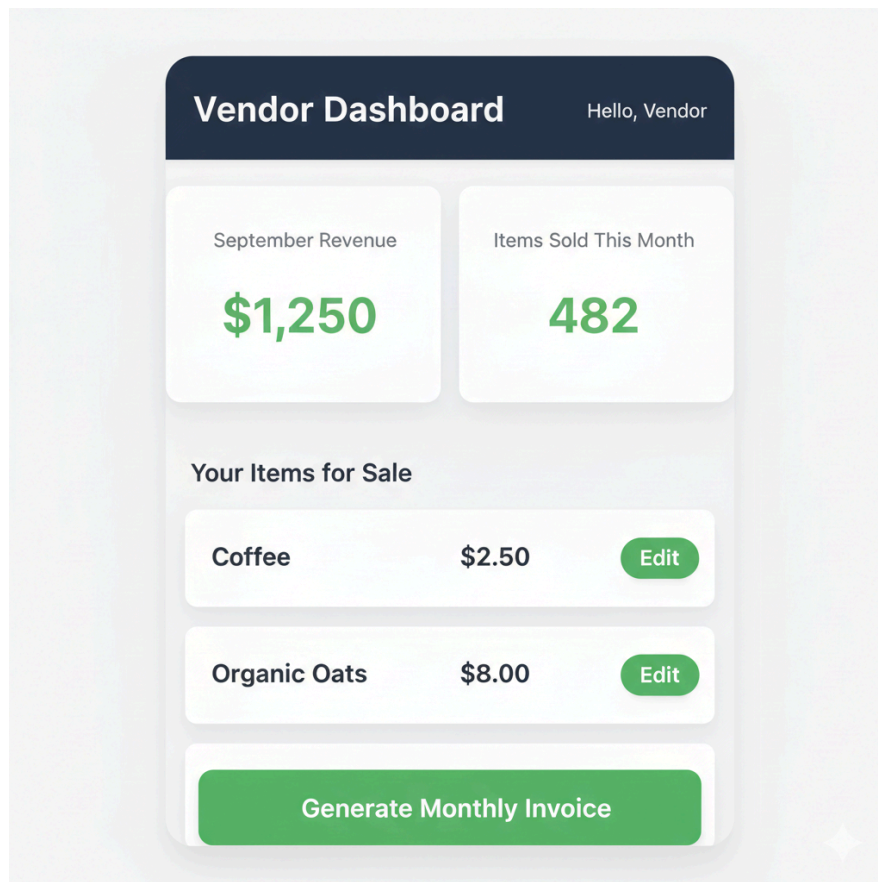

"mobile app UI mockup, Vendor Dashboard screen for "PantryPal".

Use the same professional style and colors: dark blue header (#0D253F), white background (#F8F9FA), green accents (#1DB954). The user persona is now a "Vendor".

Screen elements:

- Header with the title "Vendor Dashboard" and a welcome message "Hello, Vendor".
- Two large summary cards at the top:
  - Card 1: "September Revenue" with a value of "\$1,250".
  - Card 2: "Items Sold This Month" with a value of "482".
- Below the cards, a section titled "Your Items for Sale".
- This section contains a list of items. Each list item shows:
  - Item Name (e.g., "Coffee")
  - Item Price (e.g., "\$2.50")
  - A small "Edit" button.
- A large, green primary button at the bottom that says "Generate Monthly Invoice".

Style: high-fidelity, professional, modern UI."

## **\*\*Attempt 2: Refinement Prompt\*\***

Reason for change: The two static cards in the first version were informative but not very engaging. Replacing them with a simple bar chart provides a richer data visualization, allowing the vendor to see trends over time at a single glance.

My Refined Prompt:

"Refine the previous "PantryPal" Vendor Dashboard UI.

Maintain the same professional style, colors, header, and the "Your Items for Sale" list.

The major change is at the top:

- Replace the two summary cards with a single, wider card.
- This new card is titled "Monthly Sales Overview".
- Inside this card, display a simple vertical bar chart showing sales for the last 4 months (e.g., Jun, Jul, Aug, Sep).
- The "Generate Monthly Invoice" button should remain prominent at the bottom.

This data visualization makes the dashboard more insightful for the vendor. High-fidelity UI mockup."
